

Message from the Chairman

YCCI Chairman Takashi Uyeno

The Yokohama Chamber of Commerce and Industry (YCCI) was founded in 1880 as a non-profit, non-partisan organization. Our long-standing tradition of over 130 years of service has established us as the leading voice of Yokohama business.

In its long and successful history, the Chamber has strived to provide focused advocacy for business growth and sustainable development for the advancement of entrepreneurship, international trade relations, business innovation and excellence, and efficient business operation.

The Chamber is today considered an important element of the success formula for regional economic growth and industrial development in Yokohama and will keep moving forward to explore future development and further improvement.

We encompass a broad range of topics, including economic development, business advocacy, interfacing with all levels of government, and business consultation services, each of which is important to our membership.

I must thus realize that the YCCI is in a time of challenge and innovation and at a critical juncture for business development and dynamism. I respectfully ask for your kind attention to and cooperation with our future activities.

Takashi Uyeno

Chairman

The Yokohama Chamber of Commerce and Industry
